

Manual Instruction

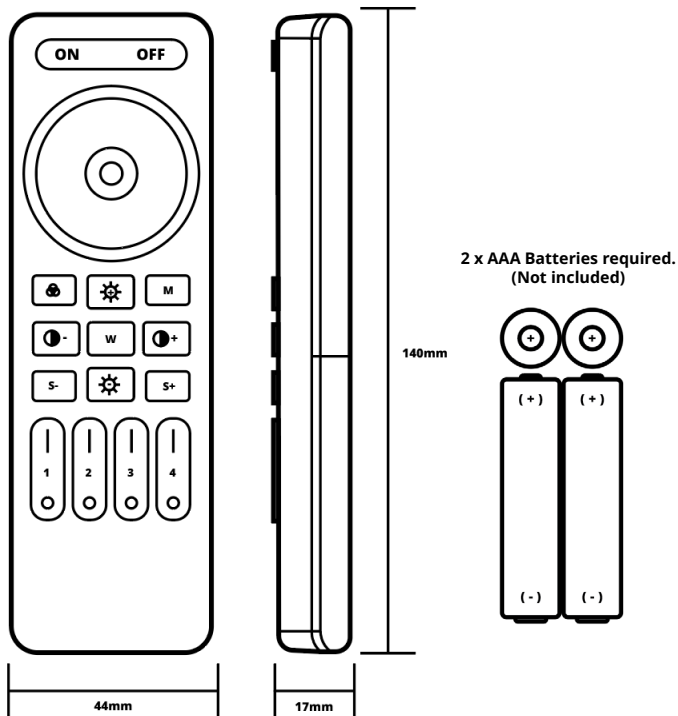

2.4GHz RF 4-Zone Remote Control

Model Number: RC03RF/RC03RFB

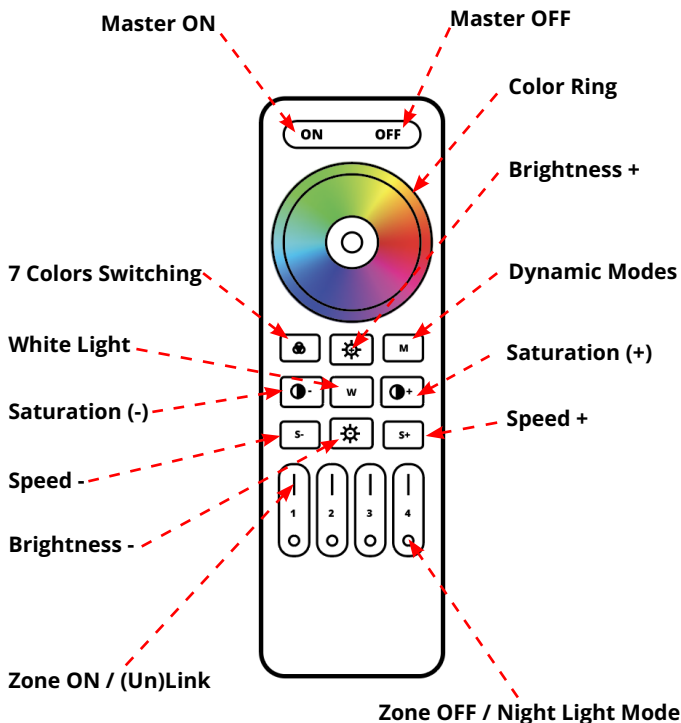

1. Features

This product adopt world-wide used 2.4GHz:frequency, GFSK control method, with the features of low power consumption, long distance transmitting, strong anti-interference and fast communication rate. It can control our 2.4GHz RF smart lights and controllers with color changing, color Temperature adjust, saturation and brightness changing.

2. Product Size

3. Button Instruction

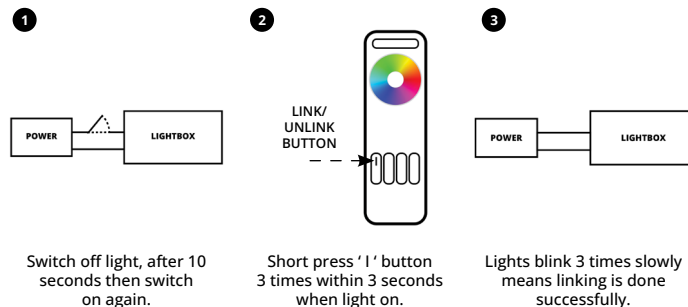

Master ON	Press to turn ON all linked devices.
Master OFF	Press to turn OFF all linked devices.
Color Ring	Touch the color ring to change colours.
7 Colors Switching	Short press: cycle through orange, yellow, green, cyan, blue, purple and red repeatedly. Long press: fade gradually through the same colours.
White Light (W)	Press to switch to white light mode.
Color Temp / Saturation (-)	In white light mode: changes white light towards cool white. In colour mode: reduces colour saturation.
Color Temp / Saturation (+)	In white light mode: changes white light towards warm white. In colour mode: increases colour saturation.
Dynamic Modes	Press to cycle through dynamic lighting modes.
Brightness +	Increase brightness.
Brightness -	Decrease brightness.
Speed -	Reduce the speed of the selected dynamic mode.
Speed +	Increase the speed of the selected dynamic mode.
Zone ON / (Un)Link	Turn individual zones ON or link/unlink zones.
Zone OFF / Night Light Mode	Turn individual zones OFF or activate Night Light Mode.

4. Linking and Unlinking Instruction

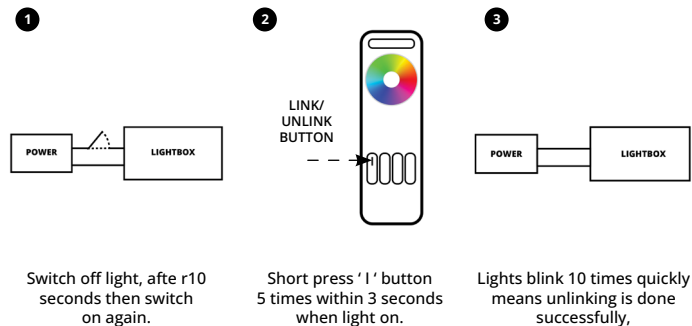

Remark: The light can be working after linking with the remote.

Linking Code Instructions

Linking failed if light is not blinking slowly, Please follow above steps again. (Note: Light that have linked can't link again)

Un-Linking Code Instructions

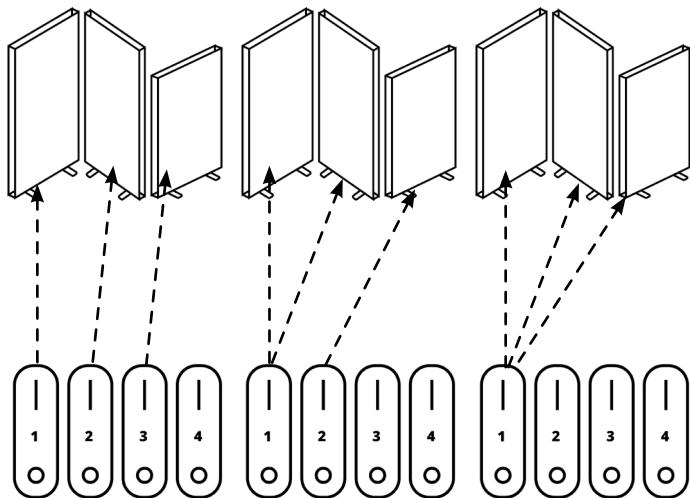

Unlinking failed if light is not blinking quickly, Please follow above steps again. (Note: Light haven't linked that don't need to unlink)

5. Group Control

You can add an endless numbers of lights to a zone on the 4 channel remote by linking the lights to different zones. This way you are completely flexible in creating different group combinations.

Below you can see some grouping examples.

Remark:

1. The user can re-programme freely as needed. One remote can control countless lamps or controllers, but one lamp or controller can only be controlled by maximum five remotes.
2. Please check the battery installation and controller (totally discharge the power), when you programme after switching off and switching on.
